

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

Experiment - 7

Student Name: Mankaran Singh Tandon

UID: 23BCS10204

Branch: BE-CSE

Section/Group: KRG-2B

Semester: 5th

Date of Performance: 15/10/25

Subject Name: Project Based Learning in Java

Subject Code: 23CSH-304

Aim:

To build a Java program that performs CRUD (Create, Read, Update, Delete) operations on a Product table using JDBC with transaction handling.

Objective:

To learn how to implement CRUD operations using JDBC, apply transaction handling, and use a menu-driven program for database operations.

Apparatus / Input Used:

- Java (JDK 8 or above)
- MySQL Database
- JDBC API
- MySQL Table: **Product**(**ProductID**, **ProductName**, **Price**, **Quantity**)
- IDE: Eclipse / IntelliJ / VS Code

Procedure:

1. Create a MySQL table **Product**(**ProductID**, **ProductName**, **Price**, **Quantity**)
2. Load the MySQL JDBC Driver using `Class.forName()`
3. Establish a connection using `DriverManager.getConnection()`
4. Create a menu-driven program with options: Add, View, Update, Delete
5. Use **PreparedStatement** for secure queries
6. Use `connection.setAutoCommit(false)` for manual transaction mode
7. Use `commit()` on successful operations
8. Use `rollback()` on errors
9. Close all JDBC resources properly (Connection, Statement, ResultSet)

Program Code:

```
import java.sql.*;
import java.util.Scanner;

public class ProductCRUD {
    public static void main(String[] args)
    { Scanner sc = new Scanner(System.in);

        try
        { Class.forName("com.mysql.cj.jdbc.Driver");
            Connection con = DriverManager.getConnection( "jdbc:mysql://"
                localhost:3306/testdb", "root", "password"
            );

            con.setAutoCommit(false); int
            choice;

            while (true) {
                System.out.println("\n--- Product Management Menu ---");
                System.out.println("1. Add Product"); System.out.println("2. View
All Products"); System.out.println("3. Update Product");
                System.out.println("4. Delete Product"); System.out.println("5.
Exit");
                System.out.print("Enter choice: "); choice =
                sc.nextInt();

                if (choice == 1) { PreparedStatement ps =
                    con.prepareStatement( "INSERT INTO Product
VALUES (?, ?, ?, ?)"

                );
                    System.out.print("Enter Product ID: "); ps.setInt(1,
                    sc.nextInt()); System.out.print("Enter Product Name: ");
```

```

        ps.setString(2, sc.next()); System.out.print("Enter
        Price: "); ps.setDouble(3, sc.nextDouble());
        System.out.print("Enter Quantity: "); ps.setInt(4,
        sc.nextInt()); ps.executeUpdate();
        con.commit();
        System.out.println("Product      Added      Successfully!");
    }

    else if (choice == 2) {
        Statement st = con.createStatement();
        ResultSet rs = st.executeQuery("SELECT * FROM Product"); while
        (rs.next()) {
            System.out.println(rs.getInt(1)      + " | "
            + rs.getString(2) + " | " + rs.getDouble(3)
            + " | " + rs.getInt(4));
        }
    }

    else if (choice == 3) {
        PreparedStatement ps = con.prepareStatement(
            "UPDATE Product SET Price=?, Quantity=? WHERE
            ProductID=?"
        );
        System.out.print("Enter Product ID: "); ps.setInt(3,
        sc.nextInt()); System.out.print("Enter New Price: ");
        ps.setDouble(1, sc.nextDouble());
        System.out.print("Enter New Quantity: ");
        ps.setInt(2, sc.nextInt()); ps.executeUpdate();
        con.commit();
        System.out.println("Product      Updated      Successfully!");
    }

    else if (choice == 4) { PreparedStatement
        ps =
            con.prepareStatement( "DELETE FROM
            Product WHERE ProductID=?"
        );
    }
}

```

```
System.out.print("Enter Product ID: "); ps.setInt(1,
sc.nextInt()); ps.executeUpdate();
con.commit();
System.out.println("Product Deleted Successfully!");
}

else if (choice == 5)
{
    System.out.println("Exiting..
.");
    break;
}

else {
    System.out.println("Invalid Choice");
}

con.close();
}

} catch (Exception e)
{
    System.out.println("Error! Rolling Back...");
}

}
```

Sample Output:

--- Product Management Menu ---

1. Add Product
 2. View All Products
 3. Update Product
 4. Delete Product
 5. Exit

Enter choice: 1

Enter Product ID: 101 Enter

Product Name: Pen Enter

Price: 10

Enter Quantity: 100 Product

Added Successfully!

Enter choice: 2

101 | Pen | 10.0 | 100
